Miguel Colomer Presents Printer Process Optimization Tips to the SMTA

Marietta, Georgia, USA – On April 30th, 2020, Miguel Colomer, Yamaha’s Printer Application Manager, gave a presentation through the SMTA Monthly Webinars program. The webinar was about “Screen Printing Key Factors”. There were 37 engineers in attendance.

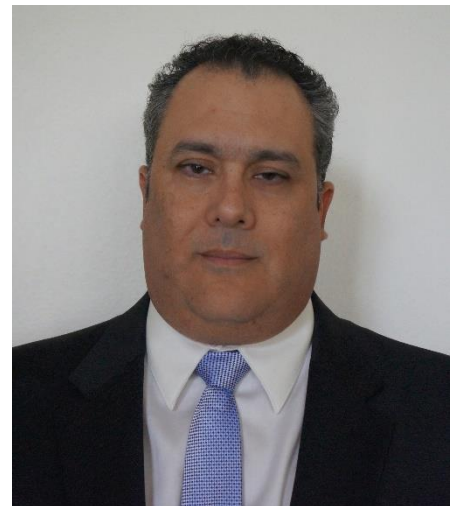

The presentation talked about external key factors that affect the screen printer process yield. Eight of these key factors were discussed with examples, that show how these interact with the process yield.

A preview of the presentation can be found here at:

https://youtu.be/Wx0EzR_roiY

The entire presentation is available on the SMTA Website at:

https://www.smta.org/knowledge/webinar_abstract.cfm?WEBINAR_ID=104

About Yamaha Motor Corporation Intelligent Machinery

Yamaha Motor Corporation has a 40-plus year history in SCARA robots, since the first was installed in 1976. Since then, YAMAHA has expanded its product lineup, which now features industry-leading product variations. The great diversity of alternatives means that customers can choose the models which best suit their particular individual requirements, optimizing their production facilities while also working to reduce their capital expenditure.
